Quality Improvement

Quality improvement plans

Your practice could monitor a quality improvement plan and a register of quality improvement activities showing which have been undertaken, and their outcomes. Using a quality improvement plan and register means you can:

- track quality improvement efforts
- identify whether improvements were made or other efforts are required to address the quality issue
- reduce duplication of effort and time
- evaluate the plan and effect of the activities conducted
- provide a learning tool for members of the practice team who want to be involved in improvement activities.

QIP 1.1.1 Our practice team internally shares information about quality improvement and patient safety.

You must:

- have a system to identify quality improvement activities.
